

TRADESMAN[®]

COMMERCIAL ROOF RACKS

AUSTRALIAN BUILT CUSTOM ROOF RACKS SINCE 1978

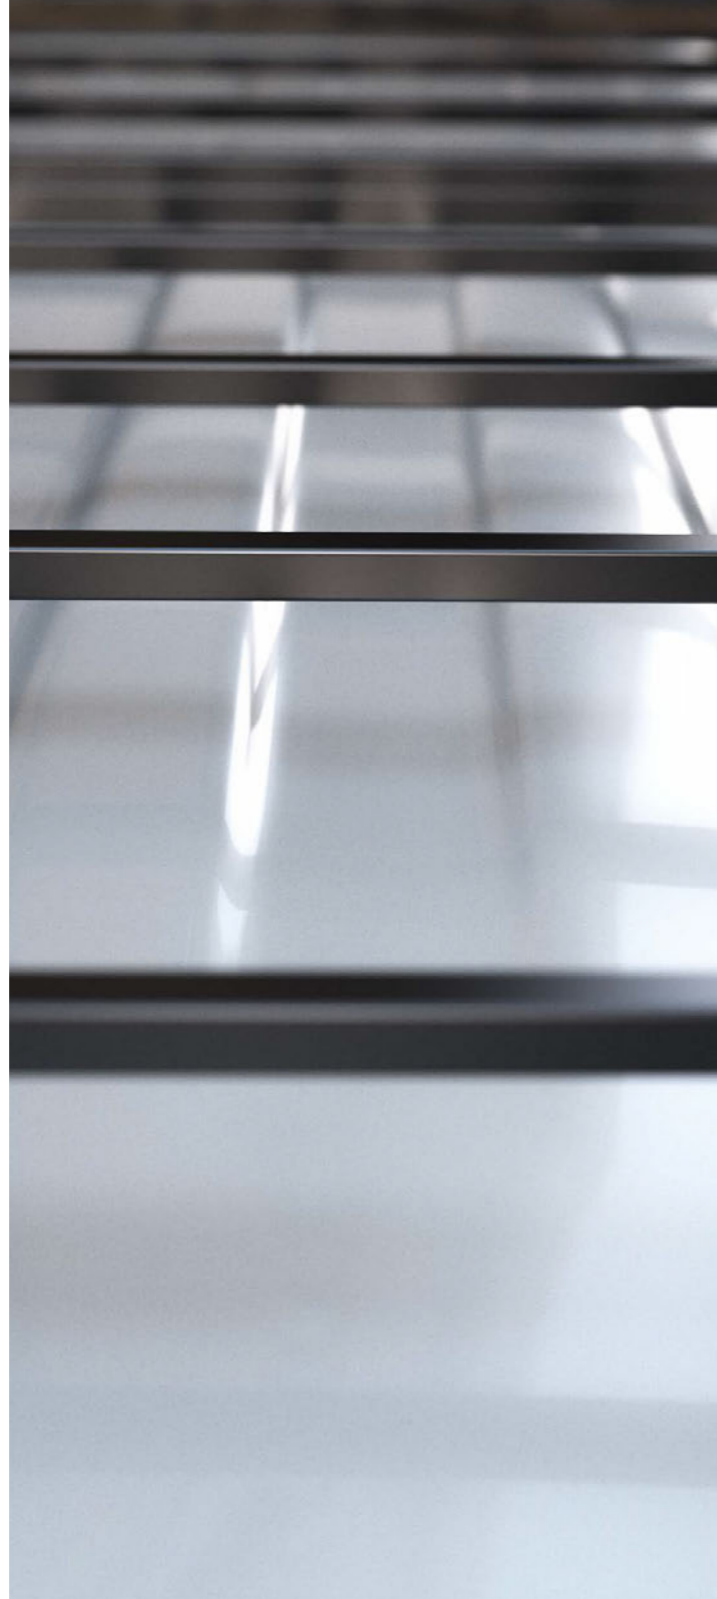

STRONG

'Tradesman Roof Racks' are built to last and have a full 100% load rating, on and off-road, so you can be sure that your rack will always be working for you, even on the weekends. Weight is distributed evenly for both simple and complex loads which ensures that your load is always safe and secure.

A MADISON - PENRITH

"I've driven in some of the harshest conditions around Australia, with complex and heavy loads and I've always been able to rely on my Tradesman rack!"

- Toyota Land Cruiser

FIT

You can count on 'Tradesman Roof Racks' to fit your vehicle and your load. Our custom-built racks and specialty options and accessories are fit for purpose. With flexible design and vehicle fitment options available, you can trust your 'Tradesman Roof Rack' for both work and play.

D FOTHERINGHAM - ROMSEY

"I'd tried for weeks to find someone who could work with my vehicle type and specific requirements and then Tradesman Roof Racks made it all seem so easy!"

- Mitsubishi Triton

QUIET

Nobody likes a noisy roof rack, that's why ours are quieter than most. 'Tradesman' has spent more than forty years refining our wind deflector designs. Manufactured and product tested in Australia, our advanced wind deflector technology actively reduces noise and drag while driving in a range of conditions.

Z MYERS - RINGWOOD

"When I switched to a Tradesman roof rack, for the first time I didn't even know I was carrying a load, they are certainly quieter than most!"

- Toyota Hilux

TRADESMAN
TRADE-MAX

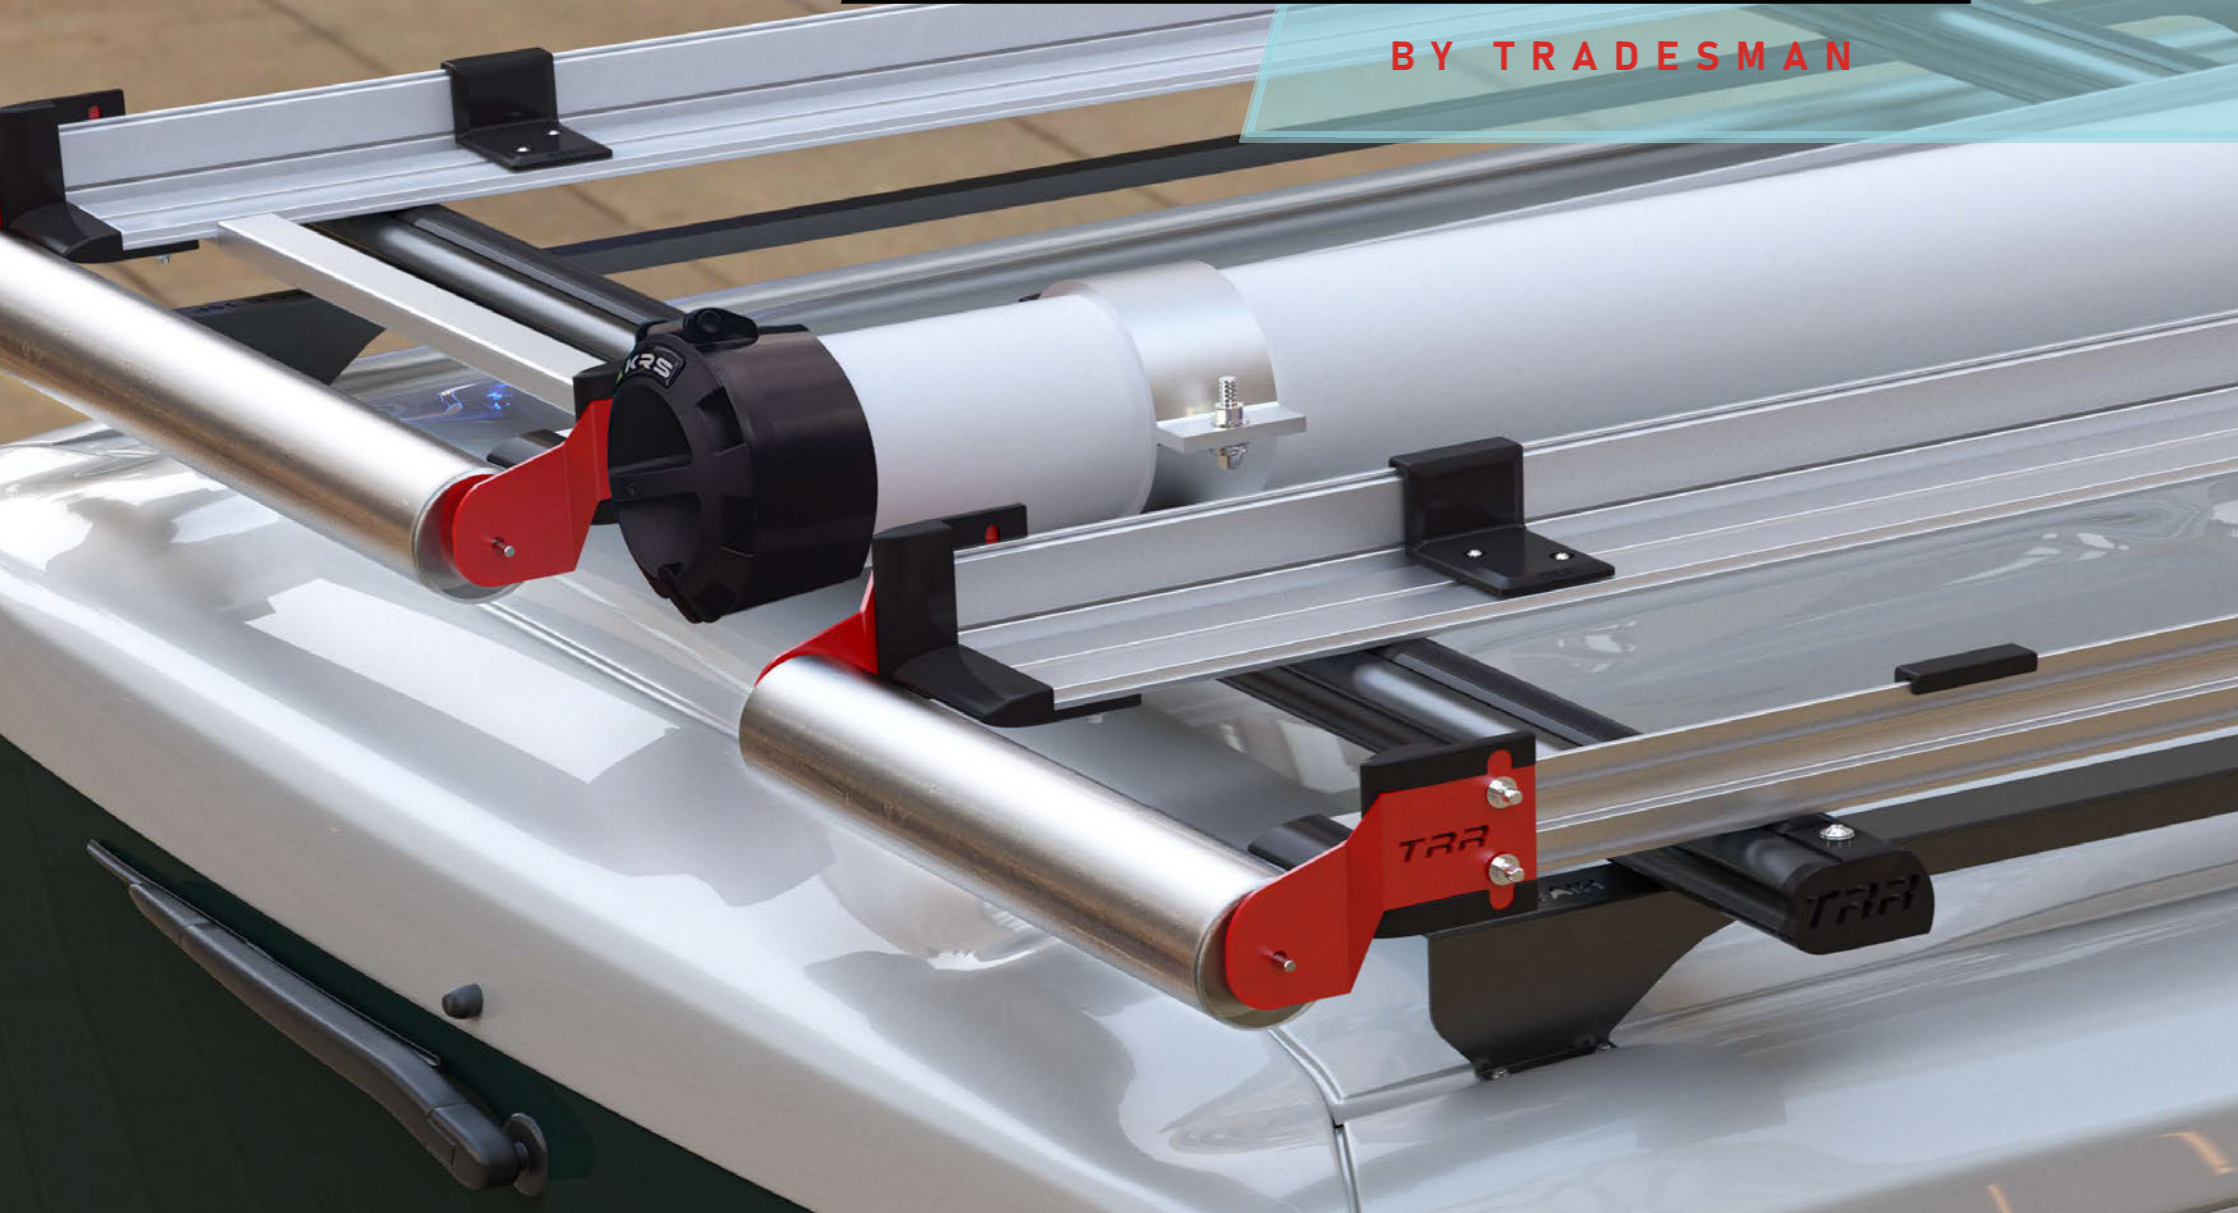

TRADE-MAX ROOF BARS

The 'Trade-Max' range features low clearance alloy roof bars, manufactured to suit a large range of commercial and 4x4 vehicles. Designed to be the lowest height possible, our roof bar systems allow for low carpark clearance where other roof rack systems may not. With detail to aerodynamic efficiency and overall strength "Tradesman" offers the strongest extrusion section on the market.

TRR[®] TECHNICIAN

BY TRADESMAN

TRR TECHNICIAN LADDER SLIDES

'TRR Technician Series Ladder Slides' are designed and manufactured in Australia. They are stylish, adaptable, tough and built for ease of use when carrying tapered and straight ladders. They are mounted by vehicle specific roof rail mounting systems that accommodate unique profile 'Textura' powder coated crossbars, fitted with removable protection strips and mounting provisions. A range of accessories are available.

TRADESMAN[®]

COMMERCIAL-MAX

COMMERCIAL-MAX ROOF RACKS

'Tradesman Commercial-Max' roof racks have been manufactured in Australia for forty years. Built from commercial grade square steel tubing and fully welded, each roof rack is carefully designed to meet every challenge head on. Robust and streamlined, with a standard of quality that has stood the test of time; our 'Commercial-Max' roof racks have earned a reputation of reliability, even in the harshest of conditions.

TRADESMAN

OVAL SERIES

OVAL STEEL

'OVAL SERIES' STEEL ROOF RACKS are tried and proven, a testament to decades of development. Manufactured in Australia with the highest quality materials and craftsmanship, OVAL STEEL is both lightweight and ultra-tough. As a fully fabricated roof rack with welded construction, the 'Oval Series' ensures strength and longevity. Extensively tested by our in-house automotive engineering team, OVAL STEEL roof racks provide superior aerodynamics, reducing noise, drag and fuel economy. Rest assured, the 'Oval Series' will stand the test of time, guaranteeing a stable and durable platform that only a fully fabricated roof rack can provide.

OPEN-REAR

The OPEN-REAR style allows a secure wind deflected storage area at the front of the roof rack whilst allowing overhang at the rear.

OPEN-ENDS

The OPEN-ENDS style is ideal for transporting lengthy items such as ladders, materials. Perfect for tradespeople and technicians.

TENT

The TENT style roof rack caters for the fitment of a rooftop tent at the rear and a secure load at the front. Suitable for rear or side hinge tents.

FLATDECK

The FLATDECK style has become a very popular choice as it not only looks sleek, but it also minimizes overall vehicle height.

BASKET

The BASKET style roof rack has a closed configuration commonly used in touring, to restrain camping equipment and or firewood.

UPSIDE DOWN

The UPSIDE DOWN style is perfect for plasterers and tradespersons who carry wide sheets and also require extra side strength to tie-off.

STYLES

OPTIONS

ROLLERS

Ladder Rollers help in loading awkward items onto the roof racks of higher vehicles. The master advantage of this option is being able to easily slide items onto the roof rack while minimising risk of personal injury or damage to your vehicle.

GALVANISING OR ZINC PLATING

Galvanising or Zinc-Plating is a popular for adding extra durability to steel roof racks that are exposed to harsh saline or coastal environments.

CUSTOMISATION

Tradesman's manufacturing facility located in Australia, so we can easily customise your roof rack to suit. Contact to one of our roof rack specialists to discuss your specific requirements.

COLOURS

Tradesman's in-house POWDER COATING colour options include: SATIN BLACK, CHARCOAL METALIC or MATTE BLACK.

MESH FLOORS

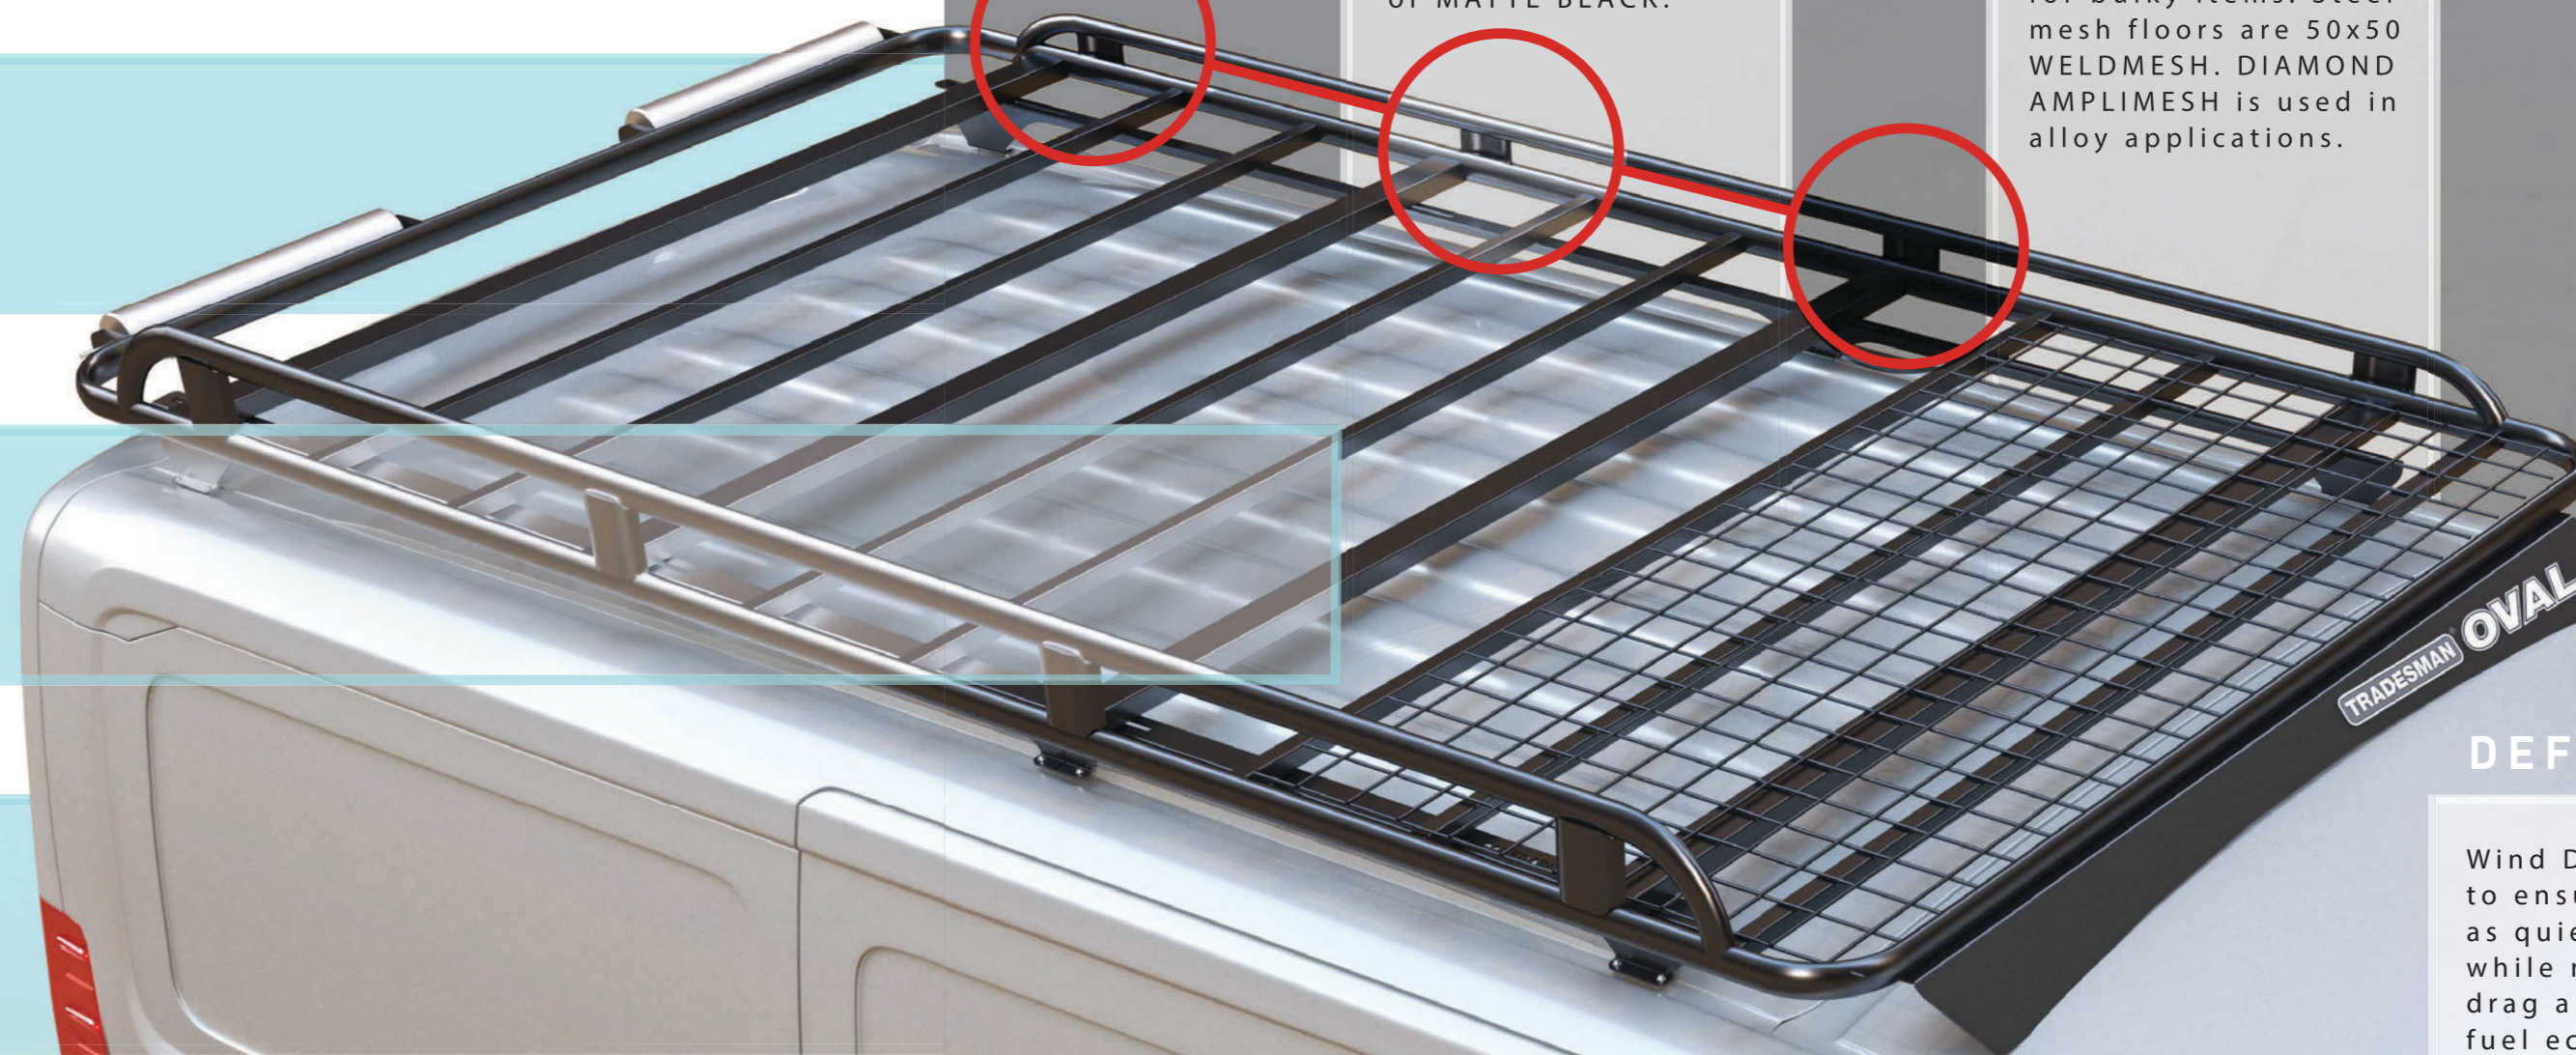

Mesh Floors allow you to stand on the rack and are handy for bulky items. Steel mesh floors are 50x50 WELDMESH. DIAMOND AMPLIMESH is used in alloy applications.

CUSTOM SIDE HEIGHTS

Choose between HIGH SIDES, LOW SIDES or NO SIDES. Low sides are a hybrid between our FLATDECK and OPEN-ENDS styles. With a height of 70mm, this option is an excellent overall height saver, perfect for low clearances.

WIND DEFLECTORS

Wind Deflectors help to ensure your rack is as quiet as possible while reducing wind drag and maximising fuel economy.

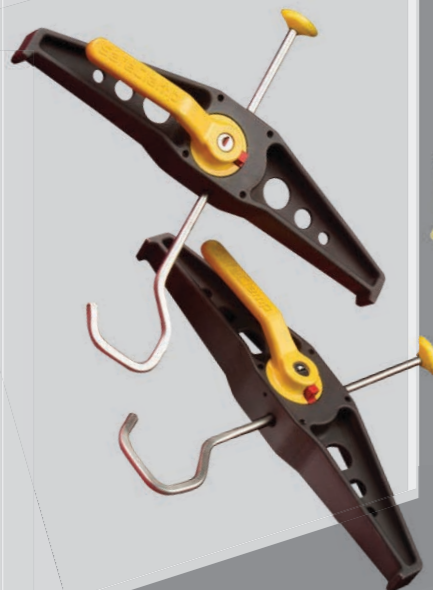

CONDUIT CARRIERS

Manufactured with quarter turn opening and steel end plates for security during heavy breaking, Conduit Carriers are an essential storage option for tradespeople and a handy accessory for fishing rods and camping poles.

SAFE STOW LADDER CLAMPS

Designed for ease of use and built strong to give you a fast way to store your ladders securely. Safe Stow Ladder Clamps are far more convenient than straps and can be key locked.

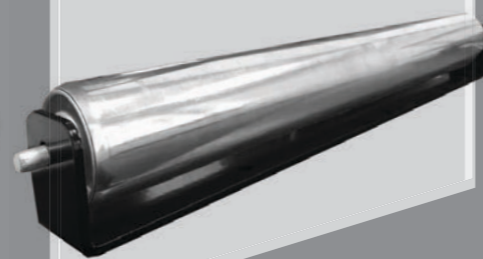

JERRY CAN HOLDERS

Constructed from 3mm TIG welded alloy for use with pressed metal or plastic storage containers. Supplied with a secure fastening strap for storing fuel or water.

BOLT-ON ROLLERS

Bolt-On Rollers are used in instances where rollers were not built into the original rack. 'Tradesman Rollers' can be mounted in pairs or singularly, either on the top or bottom rails of the roof rack.

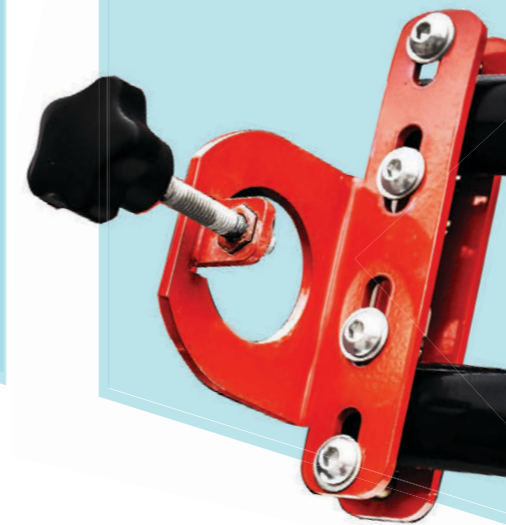

SPARE WHEEL CARRIERS

A simple and effective way to secure a spare wheel on your roof rack. This accessory is very popular with overland tourers.

SHOVEL HOLDERS

'Tradesman' Shovel Holders are manufactured from zinc plated, powder coated steel and are designed to safely store a long handled shovel.

FOLDING LADDERS

Providing an effortless way to climb onto your roof rack, the tabs on the top of the Folding Ladder hook onto the roof rack and the backing plate rests against the wheel.

JACK & SHOVEL HOLDERS

'Tradesman' Jack & Shovel Holders are manufactured from 5mm high strength steel. They are laser cut and fabricated with a zinc plated/powder coated finish. This accessory provides a secure storage location with ease of access.
